- On 20.02.2023, it was shared that the number of non-Danish citizens has increased from 1.9% to 10.5% since 1980.

According to the analysis made by the Danish Human Rights Institute, the strict rules determined for citizenship primarily affect children and young people. Denmark is among the European countries with the most rigorous regulations regarding citizenship rules. The most important reason for this is an 18-year-old rule to apply for an indefinite residence permit and citizenship. For example, in Norway children can acquire citizenship independently from 12. According to the Danish Institute for Human Rights, Denmark should allow children to apply for citizenship independently before they turn 18.
